

# Intermediate Force Carbine (IFC)

ON **EVERY**  
**MISSION**

## FACT SHEET

### KEY FACTS:

- The IFC is a Non-Lethal (NL), blunt trauma, bolt action weapon system
- Variable velocity weapon that rapidly fires on targets at different ranges
- Designed to replace current NL blunt impact munitions
- Reduces logistics and weight burdens associated with carrying multiple NL blunt impact systems

### Capabilities/Characteristics:

- Weapon system providing NL engagement out to 100 meters
- Fires one projectile with different muzzle velocities as desired by the user
- Ability to rapidly fire at approaching threats
- More accurate at greater distances than other similar NL blunt trauma capabilities
- Replaces current suite of NL blunt impact weapon systems

### Stakeholders:

- Joint Program Executive Office Armaments and Ammunition (JPEO A&A)
- U.S. Army Combat Capabilities Development Command (DEVCOM)
- U.S. Army Military Police School (USAMPS)
- Joint Intermediate Force Capabilities Office (JIFCO)
- United States Marine Corps (USMC)
- United States Air Force (USAF)

### Industry Partners:

- TBD
