

Launched Electrode Stun Device (LESD) Cartridge

ON **EVERY**
MISSION

FACT SHEET:

**XP25 (JN17)
Cartridge**

KEY FACTS:

- Commercial Off the shelf (COTS) ammunition
- Compatible with the currently fielded TASER X26 systems (X26E and X26P)
- The XP25 cartridge attaches to the front of the X26P and fires tethered probes at the target which remain connected to the cartridge by thin, insulated, copper wires
- Capable of achieving distances of up to 25 feet
- Has the ability to penetrate heavy clothing while increasing accuracy and flight stability at extended ranges
- Provides Law Enforcement, Special Forces and Ranger Battalions non-lethal escalation of force capabilities

Capabilities/Characteristics:

- Range: 25 ft.
- Lethality: non-lethal
- Effective through 2 inches of clothing

Stakeholders:

- U.S. Army Military Police School (USAMPS)
- U.S. Marine Corps (USMC)

Industry Partners:

- Axon Incorporated, Scottsdale AZ, through Aardvark Inc. (DoD distributor)
