

M112 1-1/4 LB Demolition Block

ON **EVERY**
MISSION

FACT SHEET:

KEY FACTS:

The M112 Demolition Block consists of 1.25 pounds of Composition C4 explosive packed in an olive drab, mylar-film container with a pressure-sensitive adhesive tape on one surface. The blocks are primarily used for cutting and breaching operations. The adhesive backing allows the block to be placed on any relatively flat, clean, dry surface, without movement.

Capabilities/Characteristics:

- Primary block demolition charge presently in use
- Can be cut or molded to fit irregularly shaped targets
- Can be used to field pack empty charge containers

Stakeholders:

- MSCoE - Proponent

Industry Partners:

- American Ordnance – Iowa Army Ammunition Plant, Middletown, IA
- BAE Systems – Holston Army Ammunition Plant, Kingsport, TN (C4)
